The company's risk management policies have been established to identify and analyse the risks faced by the company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies, procedures and systems are reviewed regularly to reflect changes in market conditions and the company's activities. The company has exposure to the following risks from its use of financial instruments.

- \* Credit risk
- \* Liquidity risk
- \* Market risk

#### 48.1 Credit risk

Credit risk is the risk of a financial loss to the company if a client or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the company's receivables.

As per terms and conditions of agreement with the clients, sale of Bandwidth is on prepaid basis. But for some unavoidable reasons a portion of sale remains outstanding and to make it acceptable management has made a credit recovery committee and the exposure to credit risk is monitored on an ongoing basis. As at 30 June 2017, substantial part of the receivables are those from BTCL and Mango Teleservices Limited and other clients and are subject to significant credit risk. Risk exposures from other financial assets, i.e. cash at bank and other external receivables are also nominal.

#### (a) Exposure to credit risk

#### 48.3 Market risk

Market risk is the risk that any change in market prices, such as foreign exchange rates and interest rates will affect the company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters.

#### a) Currency risk

The company is exposed to currency risk on payment of operation and maintenance expense and its reimbursement to and from consortium members and interest expense and repayments relating to borrowings incurred in foreign currencies. All of the company's foreign currency transactions are denominated in USD.

The company's exposure to foreign currency risk was as follows based on notional amounts:

| Foreign currency denominated liabilities    | 30.06.2017<br>Taka     | 30.06.2016<br>Taka     |
|---|------------------------|------------------------|
| Share money deposit payable<br>Net exposure | (119,622)<br>(119,622) | (119,622)<br>(119,622) |
| The following rate has been applied:        | <u>Taka</u>            | <u>Taka</u>            |
| US Dollar (\$)                              | -                      | -                      |
